Security Awareness and Phishing Simulation Summary

Acme Tech Solutions Inc. - Information Security team. Reporting period: October 1, 2025 to September 30, 2026.

Summary

Two phishing simulation campaigns were conducted during the reporting period, in February 2026 and August 2026. A third campaign planned for May 2026 was cancelled during the migration to a new simulation platform.

The click rate fell from 19% in the February campaign to 14% in the August campaign. The share of employees who reported the simulated phish rose from 22% to 31%.

As of September 30, 2026, 124 of 142 employees (87%) had completed the FY2026 annual security awareness training module. The remaining 18 employees were sent escalation notices with a completion deadline of October 31, 2026.

Campaign Details

Campaign	Date	Recipients	Clicked	Click rate	Reported	Report rate
Invoice lure	February 17, 2026	138	26	19%	30	22%
Shared document lure	August 11, 2026	142	20	14%	44	31%

Employees who clicked in both campaigns (7 employees) were assigned a 20-minute remedial training module.

Next Steps

1. Resume a quarterly simulation cadence beginning in FY2027 on the new platform. 2. Reach 100% completion of annual training by October 31, 2026. 3. Add a phishing report button to the mobile mail client.
